

I love XM radio. In fact I don't even listen to the stations in my listening area any more. There is no need. I hate commercials and I enjoy the fact that only a few of the XM stations have DJ's that way I am not bothered with talk unless I really need to hear some BS. Also I enjoy the fact that I can listen to the weather and traffic when I need too. And I can requested songs like crazy from my PC. I believe as a customer I am completely satisfied with this product and I should have the right to the choice of satelite radio. Thank you
